

Quarterly Newsletter

NTI Product Portfolio:

-  **DRNet®/Unified for GoldenGate Conversion**
Timely migrations to the DRNet®/Unified Product suite
-  **DRNet®/Kafka**
Powered by uLinga
-  **DRNet®/Unified for Application Integration**
Powered by uLinga
-  **DRNet®/Unified for HPE Customers**
Making data available everywhere
-  **DRNet®/Unified for Business Integration**
Ensuring data delivers business insight
-  **DRNet®/Core**
Business Continuity through Data Replication
-  **DRNet®/Vision**
Business Insights from AI/ML and Analytics
-  **DRNet®/Open**
Business Cooperation presenting Opportunities
-  **DRNet®/FileSync**
Applications and Non-Database replication
-  **DRNet®/XPbr**
Data block modification archival solution
-  **DRNet®/XPcr**
Rapid data validation and correction

The NTI Customer Voice:

Major European financial services' enterprise has chosen **DRNet®/Kafka** as key infrastructure for data streaming. Formerly an Oracle's GoldenGate customer, following their successful migration via **DRNet®/Unified for GoldenGate Conversion**, they are now augmenting their replication deployment with support of data streaming.

Demonstrating the value proposition that comes with an integrated approach beginning with CDC, access to modern hi-speed networking for superior asynchronous communications and now coupled to time-series databases, this is a further real-world demonstration of the modernization of NonStop.

Catch the latest article from the Jan - Feb 2025 issue of NonStop Insider here

NonStop Community Feature

With its roots in Change Data Capture (CDC) methodologies, NTI transforms data in support of JDBC protocols and JSON messaging to better integrate with open databases and processes. With support of Apache Kafka, adding bidirectional support to produce and consume data, NTI is a major source of middleware for real-time interaction with the open world of AI. Pursuing modernization of NonStop cannot be achieved any better than by upgrading to the new DRNet®.

NonStop systems support transaction processing, handling a broad mixture of transactions, delivering results reliably, securely and efficiently. With Kafka support available through DRNet®, NonStop systems can now stream transactional data in real-time an essential action when it comes to fraud detection. AI models do best given access to lots of data and with DRNet® and uLinga Kafka integration, transaction data streams can be made available to AI systems to process, the better to detect real-time fraudulent activity.

“Fraud detection has become a critical focus across industries as digital transactions continue to rise, bringing with them increased opportunities for fraudulent activities. Traditional methods of fraud detection, often reliant on batch processing, struggle to keep pace with the speed and sophistication of modern scams. Data streaming offers a transformative solution to enable real-time analysis and immediate response to suspicious activities.”

-- Kai Waehner, Global Field CTO. A trusted advisor and an industry thought leader.

“Application modernization is the process of taking existing legacy applications and systems and refactoring them to drive faster time to market and to improve application performance and scalability. Apache Kafka has become one of the options when looking at message driven communication between microservices. This technology differentiates itself from others by its ability to send and receive messages at a very fast rate, horizontally scale as the number of requests increases and retain the data even after messages have been received”

-- Jennifer Vargas, Principal Product Marketing Manager, RedHat.

**NTI becomes the right NonStop partner when it comes to delivering on the promise of HPE:
“Transform data into insights and insights into actionable strategies, with the right partner.”**

From Sales Leadership (Tim Dunne)

The role of a travel agent, whether engaged in the real world or virtually, is to assist with the planning, recommending alternatives and optimizing costs. The route may look attractive and yet, if connection times are slim and overnight stays are required, the desired outcome can be less attractive.

There is always going to be something else to be considered and this is the objective of any professional travel agent. Perhaps most important of all, when a travel agent is found and meets the goals set for them, over time a relationship is created whereby the needs of the traveler become well known and the plans and recommendations simplified. Travel agents differentiate themselves by the level of service provided.

Welcome to NTI, your travel agent and accept our offer of membership in the new, NTI 2% Club!

Upcoming Events:

ChileTUG – Chile Chapter Meeting

Santiago, Chile
March 27, 2025

SUNTUG – Florida Chapter Meeting

Tampa, Florida
April 4, 2025

MEXTUG – Mexico Chapter Meeting

Mexico City
April 10, 2025

EBITUG 2025

Dublin, Ireland
June 3-5, 2025

NonStop TBC 2025

The Woodlands, Texas USA
September 16-18, 2025

Coming Up:

Check out the upcoming March / April issue of The Connection for the NTI article - NTI: Your data company.

Watch as HPE NonStop Starship takes off. NTI to fuel and direct - DRNet: Your journey to discovery.

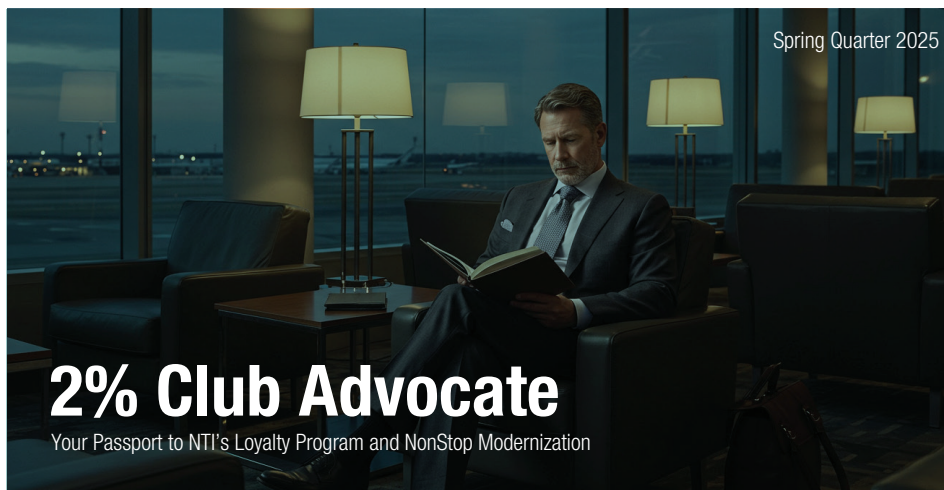

Monday, June 2, E-BITUG attendees - Join early arrivals at NTI's Early Birds Welcome Reception at the Clayton Hotel Burlington

Network Technologies International, Inc.

Spring Quarter 2025

2% Club Advocate

Your Passport to NTI's Loyalty Program and NonStop Modernization

Making News

You have now begun reading more about the 2% Club Advocate newsletter and the references being made to this Quarterly Newsletter as being the voice of the NTI loyalty program – watch for it to be digitally available shortly.

Consider this 2% Club loyalty program as a reward for those who are current, as well as potential future, NTI customers. This reference to NTI is not the only instance where NonStop independent vendors are increasing their commitment to modernization and to accessing open source where it makes sense for the NonStop customer. This loyalty program is only a part of the NTI messaging for 2025 and beyond, as NTI positions itself as your travel agent helping out at every stage in your journey to Hybrid IT and to the modernization of your NonStop systems. Destinations supported cover the full range of NTI products and packages and where your journey may have started elsewhere with product offerings that no longer meet your business requirements.

Perhaps the best way to think of this new program is to view the growth in the NTI customer relationship engagement as one that comes with its own travel agency and its own customer lounge – all virtual and yet readily accessible. Accessing your passport, providing your boarding pass, and steering you to the right gate have become synonymous with attentive services provided today's frequent flyers and for NTI it's a logical extension of this model to better embrace the NonStop customer. Join us! Become a member! Explore our destinations. NTI is at hand to help with every step in your journey.

Infrasoft's uLinga for Kafka and NTI's DRNet® share strong industry pedigrees, modern architectures, and top-tier security. Kafka acts as a powerful front-end to NonStop applications, much like NonStop once did for IBM Mainframes, enhancing rather than disrupting transactions. It enables seamless real-time data streaming while maintaining NonStop's reliability. With NTI's expertise in replication, DRNet® and Kafka together establish a robust foundation for future innovation.

-- Andrew Price, Infrasoft Director, Business Operations.

Our interaction with our NonStop customers has evolved to where we are providing a higher level of consultation to better ensure they gain the most from their NonStop system and the data created by their applications. All customers need good data and NonStop is recognized as a critical delivery element and for many, we see the modernization journey leading to acceptance within Hybrid IT accelerating as a result of the recent new developments at NTI.

-- Andrew Pham, NTI Senior Software Engineer.

New customers are amazed by how well we understand their business needs. We're here to work with you to find the best solution. We never walk away from a difficult discussion. The technology is moving quickly given rapid moves in application development and deployment.

What we see as priorities within our NonStop customer base is how best to participate in a world that is Hybrid. Our response has been to build on replication in support of tighter integration between NonStop and the rest of enterprise IT allowing NonStop to prosper as an integral participant in the world of Hybrid IT.

-- Alphonse Hoge, NTI Technical Director.

Today, NTI views communications, data movement through replication and access to streaming platforms capable of processing the amount of data created on NonStop as being instrumental to the long-term presence of NonStop within the modern enterprise. NTI is your travel agent in this regard. It knows about the special sauce and the cost saving this represents. NTI will support your enrolment in the 2% Club where service levels are elevated to where direct contact with the NTI team is encouraged. Yes, welcome to the start of the journey you know you need to undertake.
